

School Behavior Matrix: Computer Lab

Characters: Narrator, Heather, Ryan, Vic, Stacy, Mr. Magoo

Narrator: The scene is set in Room 320, one of the computer lab's at School Middle School. We see Heather, Ryan, Vic and Stacy sitting at their assigned computers getting ready to listen to directions from Mr. Magoo.

Heather: I love working on computers! I wonder what Mr. Magoo has planned for us today.

Vic: Me, too. Whatever he has in store just using these computers will make it fun for me.

Stacy: I am so glad that whoever had this computer before me left it in perfect condition. I could get right on with my password!

Ryan: Yea, mine was ready to go, too. I have all of my keys and my keyboard is plugged in correctly!

Mr. Magoo: Students, 5,4,3,2,1! Thank you. Today we are going to investigate the hairless cat. I would like you all to think about where you might search for information on this topic.

Narrator: The students are raising hands and making suggestions to Mr. Magoo about appropriate sites to search for information. Ryan is helping Heather with the key search words while Vic and Stacy get started.

Heather: Wow! These cats are freaky.

Vic: Look, this one has a tattoo (Vic points to his screen while the others look over his shoulder.)

Stacy: I am going to send these pictures to the printer so I can put them up in my locker.

Ryan: I don't think we are supposed to print anything. I think this is just research. You should probably ask Mr. Magoo.

Stacy: Oh, you're probably right. Forget it. I will do it at home.

Vic: You know what? I think I am going to copy a picture of one of these cats on my Facebook page. Then I can send it to my friends and introduce them to my new pet! (laughing)

Heather: I don't think you can get on Facebook at school. Isn't it a blocked site?

Vic: You're right. I'm blocked. The authenticator popped up. I'll have to do that at home.

Mr. Magoo: Students, please remember that you must be on sites that are school appropriate. This follows our PBS matrix of being safe with the use of computers at school. Now, I want you to shut down your computers. The class is over.

Narrator: Our four friends log out and shut down the computers. Everyone makes sure that their chairs are pushed in and the lab looks as good as it did when they came in to class. As the bell rings, another group of students is standing at the door waiting to use the lab.
